## Southampton Covid-19 Vaccine Update

4<sup>th</sup> March 2021

# Background to COVID-19 Vaccination

- Vaccines have always been at the heart of the Government's strategy to manage Covid-19
- The Government's ambition to offer everyone in JCVI cohorts 1 to 4 at least one dose of vaccine by 15<sup>th</sup> February was met two days early; second doses for these cohorts should be offered by mid-May

| <b>Priority Group</b> | <b>Risk group</b>  |
|-----------------------|--|
| <b>1</b>              | <b>Residents in a care home for older adults</b>   |
|                       | <b>Staff working in care homes for older adults</b>  |
| <b>2</b>              | <b>All those 80 years of age and over</b><br><b>Frontline health and social care workers</b> |
| <b>3</b>              | <b>All those 75 years of age and over</b>  |
| <b>4</b>              | <b>All those 70 years of age and over</b><br><b>Clinically extremely vulnerable</b>          |

individuals (not including those under 16 years of age)

# Background to COVID-19 Vaccination

- Government aims for everyone aged 50 and over and people with underlying health conditions (cohorts 5-9) to have been offered a first dose of vaccine by 15 April with second dose by mid-July
- Adults under 50 who do not fall into any of the JCVI's priority cohorts 1 to 9 will receive their vaccinations in the second phase of the roll out

| Priority Group | Risk group                                     |
|----------------|--|
| 5              | All those 65 years of age and over             |
| 6              | Adults aged 16 to 65 years in an at-risk group |
| 7              | All those 60 years of age and over             |
| 8              | All those 55 years of age and over             |
| 9              | All those 50 years of age and over             |

Phase two will begin in mid-April and aims to offer everybody aged 18 and over a first dose by 31<sup>st</sup> July

# Southampton Covid-19 Vaccination coverage to 3<sup>rd</sup> March

**4,287** received 1<sup>st</sup> dose vaccinations

**PR1**

Poole, Robin, 04/03/21

## Adults aged 70 years or more

- Approximately 9 of every 10 people aged over 70 years have had their first dose
- There is a significant difference in uptake between people of different ethnic backgrounds compared to people from a White British background
- **Between 2 and 3 in every 10 people from ethnic minority backgrounds have not had their first dose**
- There is a very strong relationship between deprivation and vaccine uptake with the most deprived population having a 4% lower uptake compared with the least deprived population

### Adults who are clinically extremely vulnerable

- Approximately 8 of every 10 people who are clinically extremely vulnerable have had their first dose
- There is a difference in uptake between people of different ethnic backgrounds compared to people from a White British background
- **Between 3 and 5 in every 10 people from ethnic minority backgrounds with clinically extremely vulnerable have not had their first dose**
- There is a very strong relationship between deprivation and vaccine uptake with the most deprived population having a 16% lower uptake compared with the least deprived population

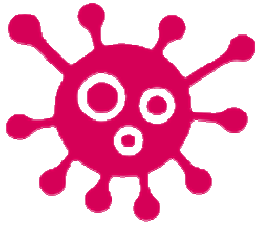

## Health and Social Care workers

- Approximately 8 of every 10 health and social care workers have had their first dose
- There is a difference in uptake between people of different ethnic backgrounds compared to people from a White British background
- **Between 2 and 3 in every 10 people from ethnic minority backgrounds who work in health and social care have not had their first dose**
- There is a strong relationship between deprivation and vaccine uptake with the most deprived population having a 6% lower uptake compared with the least deprived population
