5.	Cllr J Baillie	CON	Cllr Kaur	University Technical College	Rob Henderson
QUESTION	Will the council do all it can to support the new University Technical College (UTC)?				
6.	Cllr Chapman	LIB	Cllr Keogh	Air Quality	Adam Wilkinson
QUESTION	Poor air quality is the greatest environmental risk to health globally with air pollution particularly effecting the most vulnerable in society: children, the elderly and those with pre-existing medical conditions - often from less affluent areas. For visitors to the city particularly for those travelling in groups, active travel is impractical, and railways too expensive. What would this administration advise as an alternative to the convenience of the car and relatively cheap parking found in the city? What can residents reasonably expect to be delivered in the next two years to reduce both pollution and the traffic burden in the city?				
7.	Cllr Wood	LIB	Cllr Winning	Safer journeys to school	Rob Henderson
QUESTION	<p>How we work has changed dramatically in recent years. In many families with primary school aged children both parents work. In many single parent families, the sole parent works. Many more people are now working from home and options for before and after school childcare are either expensive or limited. As a single parent I know that childcare can take a significant part of income.</p> <p>Not all children are in an easy walk from their school. Due to increases in traffic and other safety concerns even a short walk won't be safe for young children to walk unaccompanied.</p> <p>What is the Council doing to make it easier for parents, especially working parents, to get their children safely to school, to reflect changes in employment practices?</p>
