<b>DETAIL (Including consultation carried out)</b>	
3.	We know pressures on services exist all year round. In advance of each winter, all areas of England put in place additional planning for expected increases in seasonal illnesses which may put extra pressure on our local services.
4.	In recent years there has been an increasing focus towards an integrated approach to winter planning. This is in recognition that seasonal pressure is multi-faceted and requires a whole-system response and therefore planning and assurance cannot operate in isolation.
5.	Southampton has a long history of integrated working across the NHS, social care and the voluntary sector, and learning from previous years has helped to inform our arrangements for this coming winter.
6.	It is vital we communicate effectively with our communities in the city to provide them with the advice they need to manage their illnesses and to know which service is most appropriate for their needs. Working together as an Integrated

	Care System we have potential to reach and engage with a far greater proportion of our population than we each do alone.
7.	To inform the discussion, attached as Appendix 1 is a briefing paper outlining how the NHS is planning ahead of winter pressures on urgent care services in Southampton. Attached as Appendix 2 is a dataset summarising the performance of University Hospital Southampton NHS Foundation Trust (UHS).
