

DECISION TITLE

Community Transport Proposals

DECISION DETAILS/DESCRIPTION

The Integrated Commissioning Unit and the Council's Transport Strategy Team have identified an opportunity to jointly commission transport services for people who have poor mobility or have specific support needs meaning they are not able to access public transport options. The CCG and Council fund a range of services which offer specific transport options (e.g. Dial-a-Ride) or transport as part of the service offer (e.g. day care). This results in a fragmented service delivery and does not achieve best value or best customer service.

The Integrated Commissioning Unit is proposing to work with the Strategic Transport Team to develop an integrated offer, pooling resources from across the CCG and Council to develop a local transport solution. Benefits anticipated are as follows:

- Improved access to services for housebound citizens
- Reduction in the need to provide home visiting services, through the increased use of service hubs
- Provide best value and enable health and social care service savings to be released
- Improved hospital discharges and admission avoidance
- Reduce loneliness
- Contribute to the Southampton Green City Charter
- Contribute to the development of a locality model of joining up services based around district centres
